Featured Companies

AlgoBot

A.I. Area: Deep Learning, Generative A.I., Machine Learning, Natural Language Processing (NLP) || **Website:** www.algobot.hk

A marketplace to crowdsource top performing algorithm globally

FundmanGPT is an API solution that combines FI's house view or AlgoBot's algorithmic quantitative model for short-term momentum trading and mid-term pattern recognition with the latest market news to auto-write investment commentary. It can be white-labeled as a chatbot for financial institutions, covering over 10,000 HK & US stocks and building sample portfolios.

AlgoBot partnered with Topaz Capital Management Limited, a SFC L9 firm, to launch an A.I. portfolio composed of a basket of top performing algorithms from our global algo developer community.

AlgoBot is a global developer community in which their coding skills and profile are evaluated by AI to meet FI's job vacancies via employhub.ai, our partnering A.I. HR platform.

FCC Analytics

A.I. Area: Deep Learning, Generative A.I., Machine Learning, Natural Language Processing (NLP) || **Website:** www.fcc-analytics.com

Award-winning Regtech Solutions for Financial Industry

FCC Analytics's **A.I.-driven AML transaction monitoring system** has been extensively tested and proven effective in live production environments.

Leveraging advanced Machine Learning algorithms, the solution real-time analyses vast amounts of transaction data to identify anomalies, patterns and red flags that may indicate money laundering or other illicit financial activities. This powerful tool helps organisations stay compliant with regulatory requirements, while significantly reducing the time and resources needed for manual AML monitoring. With a track record of successful deployments, our A.I.-based approach provides more accurate and comprehensive detection, leading to fewer false positives and faster identification of potential threats.

Featured Companies

Fill Easy

A.I. Area: Generative A.I. || **Website:** www.fill-easy.com

One Stop Solution for Government Verified Data

Fill Easy is an SaaS platform that specialises in the secure and compliant transfer of verified personal data in and out of China, addressing the complex regulatory challenges posed by recent changes in Chinese data laws. The new regulations make cross-border data transfers particularly difficult, requiring strict compliance with data protection and cybersecurity standards that many businesses find challenging to navigate.

Fill Easy's solution is standardised into three key components: obtaining verified data through integrations with platforms like iAM Smart, Mainland ID, and Singpass; providing a robust system for secure, compliant data transfers; and ensuring quick integration with existing systems. Companies use their solution because they simplify the process of cross-border data compliance, ensuring their operations are secure, efficient, and in line with stringent data protection regulations, allowing them to focus on their core business activities without the regulatory hassle.
